

## The impact of waste dump in Uwguaji Enugu Metropolis

Filesize: 2.58 MB

### ***Reviews***

*This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
*(Michael Spinka)*

GRIN Verlag Gmbh Okt 2014, 2014. Taschenbuch. Book Condition: Neu. 213x146x6 mm. Neuware - Seminar paper from the year 2012 in the subject Environmental Sciences, grade: A, University of Nigeria (CENTER FOR ENVIRONMENTAL MANAGEMENT AND CONTROL), course: ENVIRONMENTAL MANAGEMENT AND CONTROL, language: English, comment: People living near polluted land have higher incidences of migraines, nausea, fatigue, miscarriage and skin disorders and other forms of pathogenic diseases. Long-term effects of pollution include cancer, leukemia, reproductive disorders, kidney and liver damage, as well as central nervous system failure. Children often suffer from developmental problems and weakened immune systems. In addition to direct health effects, soil pollution also harms plants that feed on heavy metals. , abstract: Soil and water are vital for our life, health and over-all well-being. But the waste generated from human activities can be hazardous, toxic and even lethal to these two substances because of the high potential it has to contaminate them. The hazardous and toxic parts of waste from different types of human establishments comprising infectious, bio-medical and radio-active material constitute a grave risk, if these are allowed to get mixed with soil and water when it is not properly disposed. Its propensity to encourage growth of various pathogen and vectors and its ability to contaminate other nonhazardous/ non-toxic municipal waste jeopardizes the efforts undertaken for overall municipal waste management. This is why research light took us to Uwuaji dump site located in Enugu-Port Harcourt Express Way. The purpose is to collect soil and water sample for laboratory analysis which will help decipher the impact of waste dump in the soil and water by finding out the concentration of different types of heavy metals in the soil and microbial load of the water. 52 pp. Englisch.
