COUNTDOWN TO ZERO DAY: STUXNET AND THE LAUNCH OF THE WORLD S FIRST DIGITAL WEAPON

DOWNLOAD

Broadway Books (A Division of Bantam Doubleday Dell Publishing Group Inc), United States, 2015. Paperback. Book Condition: New. 203 x 132 mm. Language: English . Brand New Book. Top cybersecurity journalist Kim Zetter tells the story behind the virus that sabotaged Iran s nuclear efforts and shows how its existence has ushered in a new age of warfare one in which a digital attack can have the same destructive capability as a megaton bomb. In January 2010, inspectors with the International Atomic Energy Agency noticed that centrifuges at an Iranian uranium enrichment plant were failing at an unprecedented rate. The cause was a complete mystery apparently as much to the technicians replacing the centrifuges as to the inspectors observing them. Then, five months later, a seemingly unrelated event occurred: A computer security firm in Belarus was called in to troubleshoot some computers in Iran that were crashing and rebooting repeatedly. At first, the firm s programmers believed the malicious code on the machines was a simple, routine piece of malware. But as they and other experts around the world investigated, they discovered a mysterious virus of unparalleled complexity. They had, they soon learned, stumbled upon the world s first digital weapon. For Stuxnet, as it came to be known, was unlike any other virus or worm built before: Rather than simply hijacking targeted computers or stealing information from them, it escaped the digital realm to wreak actual, physical destruction on a nuclear facility. In these pages, Wired journalist Kim Zetter draws on her extensive sources and expertise to tell the story behind Stuxnet s planning, execution, and discovery, covering its genesis in the corridors of Bush s White House and its unleashing on systems in Iran and telling the spectacular, unlikely tale of the security geeks who managed to unravel...
