This would enable the agency to make many trade determinations before goods arrive, facilitating the low risk shipments and allowing CBP to focus trade resources on high-risk shipments. Pillar Two: Automated Targeting The second pillar is evaluating that advance information for risk of terrorism. To do this, CBP built the National Targeting Center (NTC), which stood up in October 2001. Using the Automated Targeting System (ATS), CBP has built in targeting or risk assessment rules and algorithms based upon strategic intelligence about the terrorist threat. ATS and other targeting systems are used to target trade risks, as well. As it has been developed, new capabilities have been added in ATS that allow CBP personnel to identify anomalies relevant to the trade mission. For example, ATS is now being used...
